

AI ENABLED DATA MIGRATION SOLUTIONS

Transferring legacy data can be a complex and messy process. Ensuring that no proprietary information is left behind while maintaining the highest data quality post-migration is a significant challenge. We specialize in overcoming these hurdles with our Migratek AI-enabled suite of services.

WHAT IS MIGRATEK?

Migratek, the industry leading data migration service alongside ENDEX data standardization, has created the first AI enabled data migration service. Migratek moves data regardless of how complex or how large the data is. No proprietary data is left behind with 96-99% success rates. Data quality is correct, complete and consistent post migration ensuring maximum ROI from your new systems.

ACCESS

Proprietary information

EXTRACT

Priority studies first

TRANSFORM & CONVERT

Non DICOM - DICOM

STANDARDIZE

Study/series descriptions

VALIDATE

Complete, correct migration

FEATURES AND BENEFITS

- Migratek migration services allow for the conversion of proprietary data into DICOM standard files.

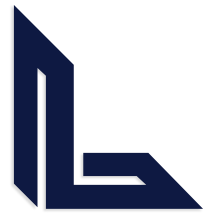

- Innovative data replication keeps production environments running at full potential with little to no disruption to clinical operations, manageable by hospital staff.
- Cutting edge conversions ensure proprietary and non DICOM data are converted to DICOM to work seamlessly with your current technology.

- Our process coupled with our proprietary technology provides for industry leading data migration speeds.
- Standardizing, extracting and migrating data faster minimizes migration timelines to get you to go-live quicker.

Simplify PACS and VNA Migration with Advanced Optimization and Migration Services

START WITH SIMPLE

ACCESS

Get direct access using proprietary connectors to accelerate migration processes.

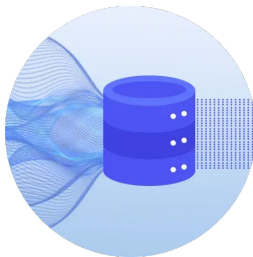

CLINICAL WORKFLOWS

Prioritizing the most relevant data and migration prefetch gets you to go live quicker.

NO DATA LEFT BEHIND

Proprietary annotations, private tags, key notes and other non-standard data are migrated.

STANDARDIZED DATA

Ensure data is correct, complete and study and series descriptions are consistently labelled.

MINIMAL DISRUPTION

By quickly replicating the database in our migration environment we minimize your operational impact.

UNPARALLELED SPEED

Our process coupled with our proprietary technology makes us the leading migration service in the market: tried, tested and retested.

POST MIGRATION BENEFITS OF STANDARDIZED DATA

REPORTING WORKFLOW EFFICIENCIES

Enables hanging protocols and dictation templates to load correctly reducing manual intervention.

IMPROVED DATA & AI ORCHESTRATION

Routes data to the correct destination and ensures secondary workflows such as data processing are efficient.

VALUE REALIZATION

Reduce costs, improve quality and create new revenue sources from decades of archived data.

Enlitic **empowers** healthcare systems to **enhance the quality** of their medical imaging data using the capabilities of **artificial intelligence**. Laitek has supported the medical community's PACS and VNA **upgrades**, healthcare mergers, and medical data management needs for over 20 years. We are the **trusted experts** you can turn to find the best medical imaging data solutions.
