

Do you know the
real reasons your
hanging
protocols don't
work?

ENLITIC

12 – 86
seconds
per study
lost

The Problem

- Hanging protocols fail to load properly
 - Rads waste time rearranging images
 - PACS Admins are called to "fix" the display
 - Additional hanging protocols are created to account for "broken" protocols
 - Too many hanging protocols are created, making it difficult to apply the right one
- Dictation protocols also fail to load
 - Rads waste time finding the right template
- PACS adds more work for everyone

The Solution

- Data standardization of DICOM study and series descriptions using artificial intelligence

10% gains
in
efficiency

The Benefits

- Data standardization has an enterprise wide impact, well beyond radiology
